**Part III DETAILED ACTION**

**Notice to Applicant(s)**

1. This application has been examined. Claims 1-8 are pending.

***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Information Disclosure Statement***

3. The references listed in the Information Disclosure Statements dated 4/20/01 and 1/30/04 have been considered by the Examiner and is attached to this Office Action.

***Claim Objections***

4. Claim 4 is objected to because of the following informalities: In line 8 of claim 4, "dose" should be changed to "does". Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

6. Claims 1, 2, 3, 4, 5, 6, 7, and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Ootsuka et al (Ootsuka) (U.S. 6,125,249).

With respect to claims 1, 2, 3, 6, 7, and 8, Ootsuka discloses an image forming device (figure 1) having a function for suspending (interrupting) a current job and executing an interrupting job (column 18, lines 35-47), comprising a plurality of paper feeding trays (591-594) and means for deciding whether the interrupting job can be permitted to use a paper feeding tray selected by the interrupting job in case the selected paper feeding tray corresponds to the tray used for the present job (column 18, lines 35-47 and column 20, line 4 to column 21, line 42).

With respect to claims 4 and 5, Ootsuka discloses determining the number of sheets required for the current and interrupting jobs, and determining whether the sheet tray would be used for the determined job based on the determined number of sheets (column 18, line 48 to column 19, line 34).
